Dear 8(e) Coordinator:

8EHQ-98-14235
Ethyl 2-(4-phenoxyphenyl)lactate
CAS# 132584-17-9

DuPont received information from a third party on the above-referenced substance. DuPont has reviewed the information for reportability under TSCA 8(e) and provides below summary of the information that has been determined to meet EPA's TSCA 8(e) criteria for reporting. It is unknown whether the information reported below has been previously reported to EPA by any third party or is otherwise considered known to the Administrator under TSCA 8(e) guidance.

Inherent biodegradability of the test substance was evaluated by the modified MITI test II. The results of the biochemical oxygen demand (BOD) indicated that the cumulative oxygen consumption level of three replicates of the test substance group were 106.0 mg/L, 108.0 mg/L, and 108.0 mg/L, respectively. They were very similar as the mean oxygen consumption of blank controls (109.0 mg/L and 107.0 mg/L). The calculated percentage biodegradation based on the BOD determination showed that this test substance has no biodegradability.

Sincerely,

S. Satheesh Anand, Ph.D., DABT
Senior Research Toxicologist
